LANDON GROUP · HOW IT WORKS · 17 OCTOBER 2026

Property Screener **Guide**

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

The **quick read**

Built from our session on 16 October. The aim is simple: **find properties that pay for themselves, and show you exactly why.** Every figure on screen can be clicked and traced back to where it came from, the same way you would check a deal by hand.

One thing to know first
The listings in it today are samples. Live listings from the major sites are being connected next, then we check 20 real listings by hand before you rely on it.

What it **does for you**

FEATURE	WHAT IT MEANS
Two ways to search	**Cash flow positive** ranks by weekly surplus after every cost. **Below market** ranks by price against the local median and shows the price where it breaks even.
Rent checked on real leases	Agent rents are compared with NSW bond lodgements and Queensland RTA figures, and the card says how many leases it checked.
Every number traced	Click any figure to see its source: the ad, government data, or an estimate.
The ad is read for you	Property type, tenanted or vacant, lease type, tenant strength, pool and views. An answer only shows when it is at least 80% sure.
Commercial goes deeper	Lease expiry, WALE, rent per m², value by tenant strength, and red flags such as a lease expiring soon.
Your settings built in	Commercial at 7.5% with a 40% deposit, Victoria off by default, and a stress-test button.
Watchlist and top five	Save properties and searches. Each morning it picks up to five new matches, or tells you there is nothing suitable today.

Getting **started**

1
Pick a mode
Cash flow positive or Below market, top of the page.

2
Set the area
Suburb, postcode or state, plus suburbs within 5 km if ticked.

3
Filter
Type, beds, price, tenancy, lease, tenant, pool, views.

4
Or just type it
"Below market, North Shore, 2+ beds, under $1.2m" sets the filters.

5
Read the cards
Result, grade A+ to D, yields, and a rent-check badge.

6
Open a property
Every cost line, deposit options, rates and the original ad.

Grades are simple: anything losing money is C or below. The cut-offs live in My settings and can be changed.

LANDON GROUP · PROPERTY SCREENER GUIDE

How the **cash flow** is worked out

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Rent has to beat **every cost**

A property only shows **"Pays for itself"** if the rent beats every cost, both weekly and yearly.

Rent after vacancy − Outgoings − Loan interest − Interest on borrowed deposit, duty and legals = Cash flow

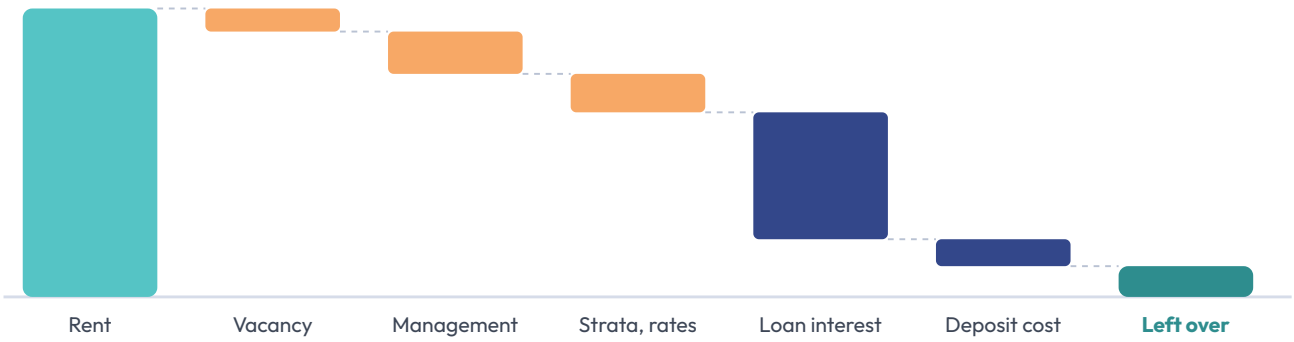

Illustration of the order costs come off, not a real property. Teal is income, orange is running costs, indigo is finance.

Every **line** and its default

LINE	HOW IT'S WORKED OUT	DEFAULT
Rent	The lower of the agent's rent and local market rent	Market check on
Vacancy	Weeks with no rent each year	Resi 2 wks. Commercial 0 wks with 3+ yrs left, 8 if less or unknown, 26 if vacant
Management	Percentage of rent collected	Resi 7%, commercial 3%
Strata, council, water	From the ad, otherwise a state average marked as estimated	Estimated if missing
Land tax	State rates on the land value	Units pay none unless a real land value is known
Insurance	Landlord insurance	Estimated
Maintenance	Percentage of rent	5%
Loan	Price less deposit, interest only	Resi 6.2% / 20%. Commercial 7.5% / 40%
Duty and legals	Current state transfer duty, plus legals and inspections	Legals $3,000

Deposits, rates and **checking the maths**

Cash or borrowed deposit
Switch between the two. Borrowed means interest on the deposit, duty and legals counts as a cost. If it only works with cash, the card says **"Pays for itself with cash deposit"**.

One rate, everywhere
The rate control sits on the main page and inside each property, and the two stay in sync. **Stress test** adds 2% to show what a rate rise does.

Check it end to end
Each property has a **"How this is worked out"** link listing every line with its amount and source.

Where the **numbers** come from

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

From source **to card**

Four labels, so you know **how much to trust it**

LABEL	MEANING	EXAMPLE
From the ad	Stated in the listing	"Strata levies $1,136 per quarter"
Read from the ad	Worked out from the ad's wording, shown only when 80%+ sure	Tenanted, net lease, pool
Searched and found	Pulled from official data	Market rent from NSW bond lodgements
Estimated	No figure found, so a state average is used	Council rates when the ad doesn't say

Drill-down: click any figure in a property's detail to see its value, label, source, a link to the source and the date it was captured.

Market rent and **the confidence badge**

NSW rents come from real signed leases over the last 12 months, by postcode, property type and bedrooms. Queensland uses the RTA's quarterly medians. A benchmark is only used with **at least 10 leases** behind it. NSW sale medians come from the Rent and Sales Report, last four quarters, units and houses split.

BADGE	WHAT IT TELLS YOU
Green	Rent checked against N local leases
Amber	Ad rent only, no local check
Grey	No rent figure

When the agent's rent runs high B

Uses the lower figure

The card shows both rents side by side, and the calculation uses market.

Agent $720/wk vs market $650/wk (NSW bond, 142 leases)

How the ad **is read**

Each listing's wording is read for the details agents rarely put in a field. An answer only appears when it is **at least 80% sure**. Below that, the field stays blank rather than guessing, and numbers like rent and strata are always taken straight from the text.

Property type · Tenanted or vacant · Lease type · Tenant strength · Pool · Views · Lease expiry and options · Parent company or franchisee

LANDON GROUP · PROPERTY SCREENER GUIDE

Commercial, watchlist and what's next

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Commercial, on **your benchmarks**

Labelled **"your assumption"**, never mistaken for market data. Net rent divided by your yield gives a value against the asking price. WALE, payback years and vacant-possession value are worked out for you.

TENANT	YOUR YIELD
Blue chip / national e.g. Woolworths, McDonald's	5%
Established regional or franchisee	6%
Local small business	7%

SECTOR	RENT PER M²
Office A / B / C	$1,000 / $750 / $450
Supermarket	$200 to $350
Specialty retail	$700 to $2,500

Red flags

- ! Lease expiring within 2 years
- ! Fixed increases below 3%
- ! Childcare under 100 places in Sydney
- ! No price shown (EOI, auction, contact agent)
- ! Tenanted but no rent in the ad

Priced listings only is on by default for commercial, since EOI and auction ads can't be screened on price.

Watchlist and **today's top five**

★ Watchlist
Star and note any property. Flags any change in price, rent or status since you saved it.

Saved searches
A mode plus filters under a name. Tick "include in daily alert" for the ones to watch.

Top five each morning
Up to five new matches, or **"Nothing suitable today"** rather than padding the list.

Auto refresh
Leave it open and it refreshes every 15 minutes.

What's **coming next**

1. **Live listings**
   Domain, realestate and realcommercial, nightly
2. **20 listings hand-checked**
   Rent within 5%
3. **Comparable sales**
   Address, date, price
4. **Email alerts**
   The daily top five in your inbox

Later: zoning and DAs in plain English, traffic counts, photo checks, and the business-for-sale screener. Anything look wrong? Note it on the property and we'll adjust.
