LANDON GROUP · PROPERTY AND BUSINESS SCREENER · OCTOBER 2026

Landon Screener **Guide**

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

The **quick read**

Built from our sessions on 30 September and 16 October. Two screeners in one: **properties that pay for themselves**, and **small bolt-on businesses that pay you back fast**. Every figure can be clicked and traced to where it came from, the way you'd check a deal by hand.

What's in it today
Real listings captured from public ads on 17 October: 38 properties and 23 businesses across three sale sites. Live feeds from the major sites are being connected next, then we check 20 listings by hand.

What it **does for you**

FEATURE	WHAT IT MEANS
Two property searches	**Cash flow positive** ranks by weekly surplus after every cost, with return on cash shown. **Below market** compares like with like (units to units) and can rank by least weekly loss.
Your buy-price range	Cracker buy, good buy, break-even and asking, on one bar. Works even with no price listed: "here's what it's worth to you".
Risk rating, with reasons	Low, medium or high, and the drivers behind it: tenant strength, lease left, increases, vacancy, sector, resold quickly.
Rent checked on real leases	Agent rent against NSW bond lodgements and Queensland RTA medians. Both numbers side by side when the agent runs high.
Ask the agent for you	One click drafts a short email asking only for what's missing, including a copy of the lease. Paste the reply back and it fills the gaps.
Business screener	$20k to $100k bolt-ons ranked by payback, with a kept-revenue view for the gardening division.
Weekly briefing	The bell top right: top pick, rate-rise test, best bolt-on and one thing to watch out for.

Getting **started**

1
Open the bell
Your weekly briefing, top right. Start here.

2
Pick a search
Cash flow positive or Below market. Property or Businesses at the top.

3
Type it or refine
"Units under $1m in NSW", or open Refine for every filter.

4
Open a listing
Range bar, risk, every cost line, map and the original ad.

5
Use the deal desk
Ask about it, drop in a brochure, make a one-page memo.

6
Star and save
Watchlist, saved searches and today's top five.

Your daughter's search is already saved: North Shore, 2+ beds, up to $1.2M, ranked by least weekly loss.

LANDON GROUP · SCREENER GUIDE

How the **cash flow** is worked out

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Rent has to beat **every cost**

A property only shows **"Pays for itself"** if the rent beats every cost, weekly and yearly. The card also shows the **return on the cash you put in**, and flags a **thin margin** under 3%.

Rent after vacancy − Outgoings − Loan interest − Interest on borrowed deposit, duty and legals = Cash flow

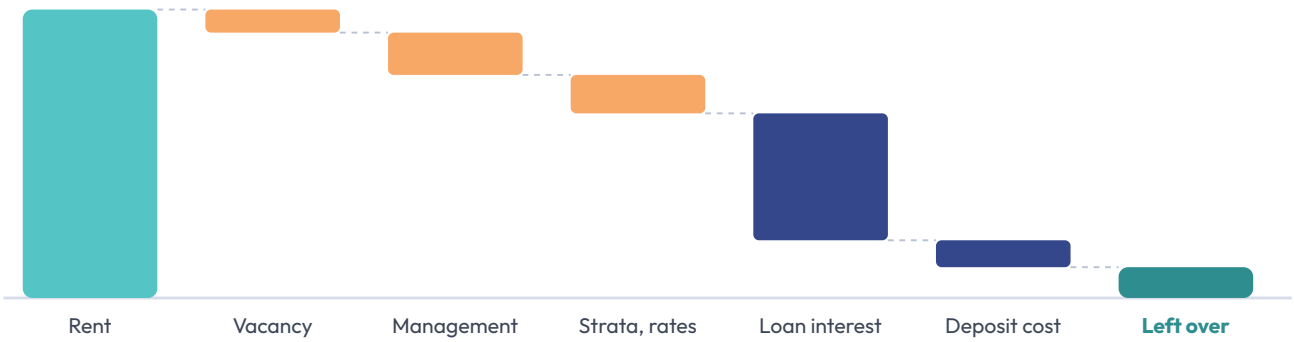

Illustration of the order costs come off, not a real property.

Every **line** and its default

LINE	HOW IT'S WORKED OUT	DEFAULT
Rent	The lower of the agent's rent and local market rent	**Market check on**
Vacancy	Weeks with no rent each year	Resi 2 wks. Commercial 0 wks with 3+ yrs left, 8 if less or unknown, 26 if vacant
Management	Percentage of rent collected	Resi 7%, commercial 3%
Strata, council, water	From the ad, otherwise a state average marked estimated. Paid by the tenant on a net lease.	Estimated if missing
Land tax	State rates on the land value	Units pay none unless a real land value is known
Insurance, maintenance	Landlord insurance; maintenance as a share of rent	Estimated; 5%
Loan	Price less deposit, interest only	**Resi 6.2% / 20%. Commercial 8% / 40%**
Duty and legals	Current state transfer duty, plus legals and inspections	Legals $3,000

Finance, rates and **your price range**

Three ways to fund it
All cash, deposit borrowed against home, or an adviser model to set with your finance adviser.

One rate, everywhere
The rate control on the main page and inside each listing stay in sync. **Stress test** adds 2%.

Your buy-price range
Cracker, good, break-even and asking on one bar, so you know what you're negotiating with.

LANDON GROUP · SCREENER GUIDE

Where the **numbers** come from

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Five labels, so you know **how much to trust it**

LABEL	MEANING	EXAMPLE
From the ad	Stated in the listing	"Rent $126,000 a year"
Read from the ad	Worked out from the ad's wording, shown only when 80%+ sure	Tenanted, net lease, blue-chip tenant
Searched and found	Pulled from official or public data	Market rent from NSW bond lodgements, zoning from the NSW Planning Portal
From agent document	From a brochure or agent email you dropped in	Lease expiry, options, review type
Estimated	No figure found, so a state average or benchmark is used	Council rates when the ad doesn't say

Click any figure in a listing to see its value, label, source link and the date it was captured.

Market rent and **the confidence badge**

NSW rents come from real signed leases over the last 12 months, by postcode, type and bedrooms; Queensland uses the RTA's quarterly medians. A benchmark is only used with **at least 10 leases** behind it. If neither the ad nor the benchmark gives a rent, it says **"Rent unknown, request from agent"** and isn't ranked as paying for itself.

BADGE	WHAT IT TELLS YOU
Green	Rent checked against N local leases
Amber	Ad rent only, no local check
Grey	No rent figure

When the agent's rent runs high B

Uses the lower figure

Agent's numbers and market numbers are shown side by side, each with weekly cash flow and yield.

Agent $720/wk vs market $650/wk (NSW bond, 142 leases)

Site **intelligence**

Location icons
Main road or quiet street, near shops, near the station, near the coast (salt air, more upkeep), views and aspect from the ad. Green, red or grey: you decide what matters.

Map, satellite, street view
Every listing is placed on the map, with satellite and street view one click away.

Zoning
Current NSW zoning from the Planning Portal, plus possible future changes with a confidence %, clearly marked as estimates.

Photo check
AI reads the listing photos for rust, bolted-on additions, hardstand, roller doors, racking and likely capex.

Coming with live data: comparable sales, traffic counts and plain-English DA history.

LANDON GROUP · SCREENER GUIDE

Commercial, risk and red flags

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Commercial, on **your benchmarks**

Labelled **"your assumption"**, never mistaken for market data. Net rent divided by your yield gives a value against the asking price; WALE, payback years and vacant-possession value are worked out for you. Tenant tier, lease type and tenancy are read from the ad.

TENANT	YOUR YIELD
Blue chip / national e.g. Woolworths, McDonald's	5%
Established regional or franchisee	6%
Local small business	7%

SECTOR	RENT PER M²
Office A / B / C	$1,000 / $750 / $450
Supermarket	$200 to $350
Specialty retail	$700 to $2,500

Risk **rating**

DRIVER	WHAT IT LOOKS FOR
Tenant strength	Blue chip lower risk; local operator higher; parent company or subsidiary/franchisee
Lease left	Under 3 years is a risk, under 2 years high; options and whether they revert to market
Increases	Fixed increases of 3% or less, below inflation
Vacancy and sector	Untenanted (re-letting can take up to two years); childcare under 100 places; office and retail weaker; QSR, medical and industrial stronger

Red **flags** and where it's listed

- ! Resold within 12 months (strong under 6)
- ! Listed in several categories
- ! Lease expiring within 2 years
- ! Fixed increases of 3% or less
- ! Childcare under 100 places in Sydney
- ! Tenanted but no rent in the ad

Which sites: each listing shows a badge for every site it's on. **Only on one site** gets an amber pill, because that's where the overlooked deals hide. Sold or under-offer listings drop off by themselves.

Moranbah QLD · block of units B

+$673 a week

Real listing from the 17 October capture, after every cost at default settings.

Asking $1,295,000 · break-even $1,953,645 · asking sits below the cracker price

Ask the agent, drafted for you

"Hey, we're really interested in this one. Could you send the passing rent, whether it's gross or net, the lease expiry and options, and a copy of the lease? Happy to schedule a call."

Copy · Open in email · status tracked per listing

LANDON GROUP · SCREENER GUIDE

Businesses, briefing and what's next

RELAIBLE
PRACTICAL AI. BUILT FOR BUSINESS

Bolt-on **businesses**

"I aim for one time every time." Each business is ranked by **payback** (price ÷ yearly profit), in your $20k to $100k sweet spot first. Gardening, mowing, landscaping and arborist listings also show **kept-revenue payback**: if they fold into your crews at no extra labour, how fast they pay back keeping 40% of customers (slider 20 to 100%).

PAYBACK	GRADE
1 year or under	A+
1 to 2 years	A / B
2 to 3 years (the market)	C
Over 3 years	D

Flags it raises

Owner-operated (customers may leave with the owner) · Figures that don't add up · Franchise fees and rules · Listed several times in different cities · Distressed seller, shown as an **opportunity** · No financials: one click to request them.

Your weekly **briefing** and deal desk

The bell, top right

Top pick with its price range, how many pay for themselves by state, how many survive a 2% rate rise, the best bolt-on, one thing to watch out for, and your watchlist. Email it or save it as a PDF.

Inside every listing

Ask about this property answers from that listing's own numbers. **Drop in a brochure** fills missing lease details. **Deal memo** makes a one-page PDF for your adviser.

What's **coming next**

1. **Live listings**
   Domain, realestate and realcommercial, nightly
2. **20 listings hand-checked**
   Rent within 5%
3. **Comparable sales**
   Address, date, price
4. **Morning email**
   Top five, or nothing suitable today

Then: more business platforms, traffic counts, DA history in plain English. Anything look wrong? Note it on the listing and we'll adjust.
